

We offer several services for industrial or institutional partners in the following fields.

Material/structural tests

- Accredited tests based on the following standards

{faq}71{/faq}

- Non-standard individual material or structural tests including cadaver biomechanical static and fatigue tests (tensile, compression, bending torsion tests even in combination).

Engineer hourly fee

Doctor hourly fee

Tests that are longer than 24 hours

27% VATAI

maximum size of 200x200x250

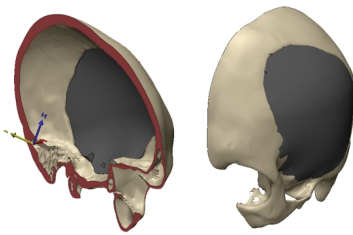

With this technology, we can create 3D models of mechanical parts or objects, plates, or even 3D plates. This is different

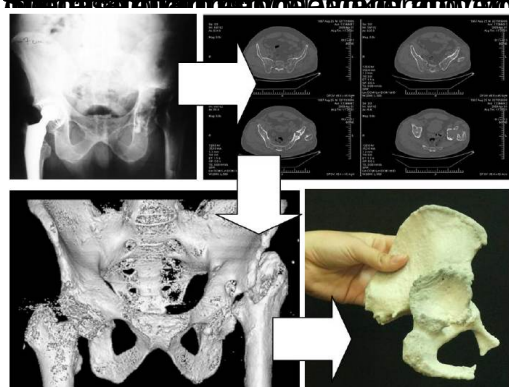

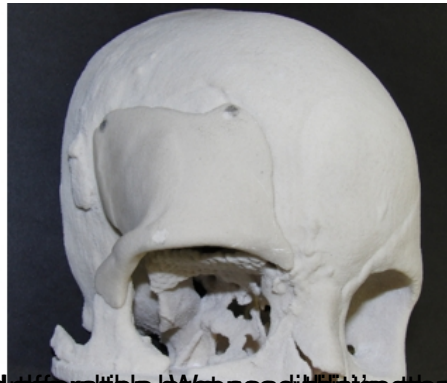

Before

After

We can also perform 3D scanning of cadaver experiments. Using this technology we can digitalise

In the case you are interested in our any service please do not hesitate to [contact us](#) .
